

Internship Task-1 Submission Report

1. Name & Email Id :

- Name : Sanagana Dharma Teja
- Email ID : sanaganadharmateja9347@gmail.com
- Contact No : +91 9618046554

2. Task Title : Responsive Company Member Team Page

3. Task Description :

My first project task is to develop a responsive web page for the Company Member Team Page. I have used HTML and CSS to bring this design to life, ensuring responsiveness across various devices.

4. Steps Taken :

- First, I have downloaded Visual Studio Code app and I have open with new file.
- I have used Document type of HTML `<!DOCTYPE html>`.
- I have used Tags like `<html></html>`, `<body></body>`, `<main></main>`, `<h1></h1>`, `<p></p>`, ``.
- And I have used CSS to style the web page.
- For example, I have used the font, color, size, padding, border, margin, width, height, text-align, background color, position etc.

5. Challenges Faced :

I have faced challenges on both HTML & CSS. When I'm using the Image tag , it is taking time to load the image. When I'm styling the web page the Position of the page may not come properly.

6. Solutions Implemented :

```

---
```

7. Learnings :

- All HTML documents must start with a document type declaration: `<!DOCTYPE html>`.
- The HTML document itself begins with `<html>` and ends with `</html>`.
- The visible part of the HTML document is between `<body>` and `</body>`.
- HTML headings are defined with the `<h1>` to `<h6>` tags.
- HTML paragraphs are defined with the `<p>` tag.
- HTML images are defined with the `` tag. The source file (`src`), alternative text (`alt`), `width`, and `height` are provided as attributes. And the image tag doesn't require a closing tag.
- CSS is the language we use to style an HTML document.
- CSS describes how HTML elements should be displayed.

8. Project Update :

My Project task is to develop a responsive web page for the Company Member Team Page which I had learned a lot of things from this Project, and this project has completed successfully.

Here is the link :
